

## **Installing R in UNIX**

1. Set http and https proxy in your environment  
setenv http\_proxy "<http://proxy:8080/>"  
setenv https\_proxy "<http://proxy:8080/>"
2. Download latest R installation from CRAN to your local area  
wget <https://cran.r-project.org/src/base/R-3/R-3.2.4.tar.gz>
3. Unzip and goto unzipped files  
tar -xvf R-3.2.4.tar.gz  
cd R-3.2.4
4. Run configuration and make build  
./configuration  
make  
make check
5. Run test script  
./bin/R -f test.R

## **Installing R Packages**

1. Run R installation command  
>install.packages("package")
  - You will get the popup and select "HTTP mirror" -> "india"
2. Example:  
>install.packages("caret")
